

Prestige provides a straightforward process for designing, approving, manufacturing, and receiving custom doors, windows, railings, and accessories. The steps below outline what to expect from initial design through delivery.

1. DESIGN AND APPROVAL

- 1 Select a Design** - Browse PrestigeIronDoors.com, design publications, or other reference sources and select the style or inspiration you prefer.
- 2 Send Reference Information** - Send a reference image and available measurements. For replacement projects, a qualified installer should verify the opening. For new construction, provide the planned rough-opening specifications.
- 3 Review the CAD Drawing** - Prestige will prepare a CAD drawing for review. Mark up requested revisions and return it to us. Revisions may be made until the design and specifications are approved.
- 4 Choose Product Options** - Confirm glass, finish, color, hardware, and other applicable product selections.
- 5 Approve for Production** - Manufacturing begins after the final CAD drawing and order specifications are approved and the required production deposit is received.

2. PAYMENT

Production Deposit	Final Product Balance
Production begins after Prestige receives the production deposit stated in the approved quote. The standard deposit equals fifty percent (50%) of the discounted price of the quoted door and window units, including selected add-ons and excluding installation.	When manufacturing is complete, Prestige will provide photographs of the finished order for review. The remaining product balance is due before shipment. Packing and crating are completed after final approval and payment.

3. PRODUCTION AND ESTIMATED TIMING

PLEASE READ CAREFULLY	Most custom products require approximately three to four months from order approval to delivery. This is an estimate, not a guaranteed date. Production, inspection, freight, customs, weather, or other circumstances may affect timing.
------------------------------	---

Prestige will communicate material schedule changes as information becomes available. Customers and contractors should avoid scheduling demolition or time-sensitive follow-on work until delivery is confirmed.

4. SHIPPING, WAREHOUSE PICKUP, AND DELIVERY

- Warehouse pickup.** Products may be shipped to the nearest available bonded warehouse or freight terminal. Installers and contractors commonly pick up units from the designated facility.
- Pickup timing and storage.** Arrange pickup promptly after arrival. Products should be collected within two (2) days of notice. Storage fees may begin after three (3) days and are the customer's responsibility.
- Warehouse charges.** Prestige will pay standard inbound and outbound warehouse handling charges, if any, for warehouse pickup. Storage and special handling charges are the customer's responsibility.
- Home or jobsite delivery.** Door-to-door delivery may be available for an additional charge. This is commercial freight delivery of large, heavy cargo. The customer or installer must coordinate the appointment, be present, and provide appropriate access, equipment, and personnel. Oversized units may require special handling and multiple helpers.

5. WARRANTY AND CODE COMPLIANCE

- Warranty.** See the Prestige Limited Product Warranty included with the quote package.
- Florida product approvals.** Standard Prestige doors may carry applicable Florida Product Approval documentation. Requirements vary by jurisdiction and project.
- Local verification.** The purchaser is responsible for confirming that the selected design, glazing, approvals, and installation method satisfy applicable building-department, inspection, plan, and project requirements.
